

Name of research project:	IWM training and communications for grain growers and grains advisers
Research organisation(s):	Independent Consultants Australia Network P/L and Agronomo P/L.
GRDC Project code:	ICN00009
Key contacts:	John Cameron NSW / Qld: Ph: 02 9482 4930 icanjohn@tpg.com.au Andrew Storrie WA / SA / Vic / Tas Ph: 0428 423 577, andrew@agronomo.com.au
Project objectives:	Delivery of training workshops on integrated weed management in cropping systems to grain growers and their advisers. Some 60 1-day grower workshops are planned, with 2-day adviser workshops being run on demand.
Project period: Start and finish dates:	2009-2013
Project outcomes and status:	Grower workshops commenced in July 2009 and will run until 2012/2013. Some 60 are planned. Workshops will assist growers to manage weeds in an environment where herbicide resistance is causing an increasing number of herbicides to fail on key weed species. Workshops look at the problem of herbicide resistance and the use of a more diverse range of weed management tactics and how these can be adapted to suit the needs of individual growers and paddocks.
