

Name of research project:	IWM extension Northern Region
Research organisation	Independent Consultants Australia Network
GRDC Project code	ICN00016
Key contacts	John Cameron 02 9482 4930 john@icanrural.com.au Mark Congreve 0427 209 234 mark@icanrural.com.au
Project objectives	<p>ICN0016 is a GRDC northern region extension project targeted to growers and advisers that strives to deliver a better understanding of the key issues driving sustainable weed management in the northern region and the implementation of appropriate management changes required to address these issues.</p> <p>The project achieves this objective via keeping abreast of the latest outcomes from GRDC and agribusiness research programs and packaging this information for delivery to advisers and growers – utilising a range of delivery techniques including field day presentations, press releases, fact sheets, workshops and technical resources for agronomists. Most project activity is directed to specified training and resource development activities.</p>
Project period: Start and finish dates	2013-2019
Project outcomes and status:	<p>Development of a gap analysis of weed research & extension needs for the northern region – updated annually for the GRDC northern panel.</p> <p>Package the latest information into appropriate delivery formats for use by growers and advisers – numerous press releases (>30), fact sheets (7), webinars (11) and field day presentations (>50) have been delivered.</p> <p>A technical manual for agronomists on pre-em herbicides has been developed, with a manual on post-em herbicides in development.</p> <p>Dedicated workshops on pre-emergent (29) and post-emergent (28) herbicides will have been delivered by June 2019.</p>
